- Andreas Sidiropoulos, MD
- Virgilio Vasquez, MD

Our approach is to care for the **whole person.**

Mental health, physical health, and dental health are interconnected, and for that reason we strive to be the “health home” for individuals we serve, meeting all health needs under one roof.

Patients saw a **15% reduction in inpatient hospitalizations** and **17% reduction in emergency department visits** after one year of being a patient at the Integrated Health Clinic.

The Integrated Health Clinic is a partnership between HealthWest and Hackley Community Care Center. In our clinic we have doctors, physician assistants, psychiatrists, registered nurses, medical assistants, dental hygienists and a dentist who have expertise in the areas of diabetes, blood pressure, asthma, COPD, smoking cessation, weight loss, dental care and other important health topics. The clinic even has an on-site lab where clients and employees can get lab work done, such as blood work.
