Muskegon County Resources for Pain Management Patients

As patients seek to continue pain management after the close of the Michigan Pain Consultants facilities in Michigan, HealthWest and Public Health - Muskegon County would like to highlight the resources available in Muskegon County.

Successful pain management varies from patient to patient. It's important that patients contact their primary care physician to discuss their pain management plan and if a referral to another pain management facility is necessary.

If patients are without a primary care provider, they should check with their healthcare insurance company, contact 2-1-1 (<https://mi211.org>) or one of the organizations listed below.

- **Corewell Health:** 877-362-8362
- **Hackley Community Care:** 231-737-1335
- **Muskegon Family Care:** 231-739-9315
- **Trinity Health:** 616-685-8500
- **University of Michigan Health - West:** 616-252-7200

Additional Resources

- University of Michigan Pain Guide (<https://painguide.com/>)

Not everyone who is in pain management is prescribed opioids. However, it is standard practice for those that use opioids to obtain naloxone/Narcan, in case of overdose. There are several ways to obtain naloxone/Narcan free of charge. To find where this is available near you, please visit:

- **HealthWest:** Free Narcan vending machine in the lobby of Mental Health Center at 376 E. Apple Ave.
- **Next Distro:** <https://nextdistro.org/michigan>
- **The Grand Rapids Red Project:** <https://www.redproject.org/>
231-563-6865, 1270 E. Laketon
